

# ADOTAPE

### Description

A specially developed matt finish waterproof pressure-adhesive PVC tape. Available in two grades for use on all types of concrete formwork in climatic conditions ranging from cold to tropical.

### Advantages

- Excellent adhesion even where residual release agent is present on form face.
- Retains flexibility at lower temperatures.
- Suitable for use at considerably higher ambient temperatures than conventional formwork tapes.
- Thinner, so as not to mark concrete.
- Suitable for use with all types of release agents.

### Physical Data

Overall Thickness	0.14
Breaking Strength ( N/cm width )	23
Adhesion to Steel ( N/cm width )	1.3
Temperature Range	-100 to + 800°C

### Application

Ensure surfaces are touch-dry. Apply to formwork prior to use of release agent but in the event of this not being possible wipe area as clean as possible. Apply **ADOTAPE** along the joint taking care not to cause any undue stretching so as to avoid any possible creepback. Press firmly on to surface and allow **ADOTAPE** to absorb any residual form release agent before pressure is re-applied to achieve maximum adhesion. The stability of the adhesive prevents sagging and distortion, even when used at high temperatures, unlike some tapes which are available.

### Roll Dimensions

Width 50 mm    Length 33 metres.    25 and 75 mm widths are available by special request.

### Packaging

Carton 18 rolls    Box 3 rolls

### Colour

Grey (Yellow or white can be supplied if ordered in minimum quantities of 25 cartons).

### Storage

Store at room temperature and protect from direct heat.
