

ADOBRITE

Hard Surface and Vehicle Cleaner

Description

ADOBRITE is a light amber free flowing liquid which has been formulated to be used on all hard surfaces, including metals. It is designed to be diluted at a rate of 5 to 1 with water when used through pressure washers.

Advantages

- Not classified as dangerous to the environment which makes it ideal for situations where splashes could adversely affect plants, ponds etc.
- Classified as non-hazardous according to the CHIP 2 regulations, thus increasing the safety of the user.
- Can be applied by a wide variety of cleaning methods.

Preparation and Application

By spray or brush - Dilute **ADOBRITE** 50/50 with water and mix until product is totally dispersed. Spray or brush onto area to be cleaned and leave for 2 to 3 minutes. Rinse off thoroughly using a hose fitted with a hose gun with a variable nozzle set to apply at high pressure. Particularly heavy deposits of grease, oil or carbon may need scrubbing before rinsing. For estimating purposes 1 litre of undiluted product will give a coverage of approximately 8 to 12 square metres using this method.

By pressure washer - Dilute 1 part **ADOBRITE** with 5 to 7 parts water ensuring the product is totally dispersed. Use the resulting solution on the surface to be cleaned in accordance with the machine manufacturer's instructions until all soiling is removed. Rinse the cleaned area thoroughly with water.

By scrubber dryer - Dilute 1 part **ADOBRITE** with 10 to 12 parts water ensuring the product is totally dispersed. Use the resulting solution in accordance with the machine manufacturer's instructions. The addition of a small amount of antifoam into the recovery tank of the scrubber dryer may be necessary to enable its full capacity to be utilised.

By mop, sponge or cloth - Dilute 1 part **ADOBRITE** with 2 to 5 parts water ensuring the product is totally dispersed. Mop or wipe the resulting solution over the area to be cleaned until all soiling has been removed. Rinse mop, sponge or cloth in clean water and wipe over the cleaned area to remove product residue.

Storage

Protect from frost. In unopened containers the product has a shelf life of at least 12 months.

Health and Safety

ADOBRITE is not considered hazardous according to the classification methods outlined in the CHIP 2 regulations. However, contact with the eyes and skin should be avoided. Should any contact occur, rinse the affected area thoroughly with plenty of water.

Please refer to the separate **ADOBRITE** Health and Safety Data Sheet.
