

DEGREASER

Emulsifiable Solvent Degreaser

Description

A blend of petroleum distillates, and selected non-caustic surfactants. The product is designed to remove oil, grease, wax, bitumen and other extraneous materials from a variety of surfaces. It can be used as supplied or, dependant upon the degree of soiling can be pre-diluted with either water or spirit.

Degreaser is suitable for use on concrete, stone, wood, steel, terrazzo and many other surfaces. The solubilised contaminants can then be removed easily as an emulsified solution by washing off with water or by wiping with a wet cloth.

Application

Remove heavy surface build up and contamination with a scraper. Apply Degreaser to contaminated surfaces using low pressure spray equipment or brush. Allow sufficient time for the product to dissolve contaminants, aided by brushing if necessary, before flushing with water. Heavily contaminated surfaces will need longer and may need a second application.

For light cleaning, Degreaser can be diluted with either water or spirit before use. For terrazzo dilute with water. When handling Degreaser use impervious gloves and eye protection. If the product is to be spray applied ensure adequate ventilation or wear breathing mask suitable for organic mists and vapours. The product is a powerful degreaser and repeated or prolonged contact will dry out the skin and could lead to dermatitis. Keep away from naked flames and other sources of ignition. Application details should be read in conjunction with our Health and Safety Data.

Physical Properties

Appearance:	Clear pale straw coloured low viscosity liquid.
Density@ 15°C:	0.895
Boiling Point:	100°C
Flash Point:	47°C (PMCC)
Vapour Pressure:	< 1mm Hg @ 20°C
Vapour Density:	Heavier than air
Control Level:	5 mg/m ³ Max

Classification

EC Labelling regulations under category FLAMMABLE LIQUID, NOS

Health & Safety

The product should be used in a careful and responsible manner.
Refer to Health and Safety Sheet for detailed information.

Fire Hazard

Extinguish with foam, dry chemical, CO₂, water, fog, sand or earth, **do not** use water jet systems.

Storage & Handling

No special storage facilities are needed.

Should spillage occur do not allow to enter drains, absorb with sand or earth for subsequent disposal.

Packaging

Degreaser is packed in 25 Litre and 205 Litre factory sealed containers.
