

SCAFCLEAN

Cleaner & Preservative for Scaffold Fittings

Description

SCAFCLEAN is a light amber free flowing liquid that has been formulated to be used in the cleaning of scaffold and other fittings.

Advantages

- Quickly frees rusted threads to allow easy movement.
- Leaves a light oily residue to reduce rusting in storage and use.

Application

Fittings should be cleaned of loose dust and any concrete adhering to them.

For light cleaning apply liberally by spray or brush.

For heavier cleaning, fully immerse in **SCAFCLEAN** and leave for 15 to 20 minutes. Agitate occasionally.

Remove and allow any excess **SCAFCLEAN** to drain back into the container. Check threads for free movement.

(Fittings that are badly corroded may require a second or more applications)

Place in stillage and allow to dry before exposing to wet weather.

Where long or exposed storage is anticipated treat with **Adoshield**.

Storage

In unopened containers the product has a shelf life of at least 12 months.

Health and Safety

During application avoid contact with eyes and skin. In the event of eye contact irrigate immediately with copious quantities of water and then seek medical advice. In the event of skin contact wash with soap and water, or resin removing cream.

Reference should be made to our separate detailed health and safety sheet.
