

Knapsack Sprayer

Technical Specifications

20 Litre Basic Plastic Knapsack Pump Sprayer

20 Litre Knapsack Pump Pressure Sprayer general purpose sprayer with up to 20 litre capacity, built in lid based hand pump and comfortable shoulder straps

A great value pressure pump, ensure to wash after every use, fully removable top section allowing solutions to be mixed inside the sprayer without the need for a separate mixing container.

Adjustable spray lance to enable easy and accurate spraying, shatterproof and frost proof GRP lance, fitted, as standard, with safety pressure release valve.

Features:

- 20 Litre capacity
- 3 Different Nozzles Included
- Adjustable shoulder straps
- Adjustable trigger lock
- Angled lance for those awkward spots
- Marking of measurements on tub
- Nozzle clips onto handle to keep it clean and for easy storage

Maintenance

To maintain the life of the sprayer, we recommend after using resin based products such as surface sealers and curing agents, that RESOKLENS cleaner be used to wash down any residue that is left in the nozzle and lance, to prevent clogging and thus maintain the spray effectiveness and even spray coverage. After using RESOKLENS, wash down with clean water.

For other chemicals that are solvent based such as release agents like ADOSTRIP, we recommend using ADOWASH to clean the sprayer after use then wash down with clean water. Any water based chemical products just clean with water after use.
