

Hand cleaner for removing metal contaminates from skin

Premium Metwash is a new advance in soap technology. Ingredients in Premium Metwash will bond with metal residues and allow them to be cleansed.

There are no harsh solvents, abrasives or phosphates added to Premium Metwash, so hands are left clean without being chapped or irritated. The special conditioners and emollients added to Premium Metwash also make it an ideal industrial soap.

Advantages

After working with lead, and other metals, washing with conventional soap and water can leave significant metal residues on skin.

- Premium Metwash will mash all metal residue from soiled skin.
- No solvents or abrasives are added to Premium Metwash.
- Premium Metwash contains conditioners and emollients to care for skin.
- Premium Metwash is non-toxic and biodegradable so poses no threat to the environment.

Application

Advice on use

After working with lead and other metals and before eating or drinking pour a little Premium Metwash Soap onto your hands, work up to a good lather with warm water and thoroughly clean all skin surfaces exposed to the metal and its residues.

Premium Metwash may be used safely as a hand soap or as an all-over body cleanser.

Lot Sizes

500ml bottles

Contains: No CLP pictograms requited

Surfactants: <10%

Detergents: <10%

Conditioners: <3%
